HARMONIOUS

FUND MANAGER GUIDE

Adding a fund or family office

When a fund, family office or company invests, several of its people usually need to be involved. You add the business once, then give each person their own access: someone to fill in the details, the person who signs, the owners who verify their identity and colleagues who only need to follow along.

WHERE TO FIND IT

My Funds › your fund › Investors Sign in at app.harmonious.co/client-login

Before you start, have ready

- The business's legal name, its type (for example family office, LLC or partnership) and its EIN, if you have it.
- One main contact: their name and the email they will sign in with. The invitation goes to them.
- The name, email and title of everyone else who needs access, and what each person should do.
- The investment amount, if you know it. You can add it later.

Add the business

1 Open Add investor

Sign in, select My Funds, select the fund and open the Investors tab.

Select Add investor, then choose Add one investor.

ON SCREEN

My Funds | Investors | Add investor | Add one investor

2 Choose Business / organization and enter the main contact

Select Business / organization at the top of the form.

Enter Contact first name, Contact last name and Contact email for the person who will lead the investment, then the Legal business / entity name.

The main contact gets the invitation and uses their own login. The business, not the contact, is the investor on every agreement.

ON SCREEN

Business / organization | Contact first name | Contact last name | Contact email | Legal business / entity name

3 Add the business details

Select Search existing investors first, so the business isn't entered twice.

Enter the Investment amount (USD) if you know it. Then select Enter Full Investor Details and open Investment Profile to choose the Entity type, such as Family office, LLC or Partnership, and add the Jurisdiction and EIN / Tax ID if you have them.

Everything here is optional. The main contact is asked to confirm it.

ON SCREEN

Search existing investors | Investment amount (USD) | Enter Full Investor Details | Investment Profile | Entity type

4 Add and open the investor's page

Select Add & invite · Open record. The main contact is emailed their invitation, and the investor's page opens.

On that page, open Verification & actions. The next steps all happen there.

ON SCREEN

Add & invite · Open record | Verification & actions

Give the team access

1 Assign someone to fill in the details (optional)

Under Completed by, select Assign someone to complete, choose Prepares details and enter their Full name, Email and Title, such as Analyst or Family office CFO. Select Assign and email.

A preparer can enter details, owners and signers, and upload documents. They can't pass identity checks, sign or send money. You can assign more than one.

ON SCREEN

Completed by | Assign someone to complete | Prepares details | Assign and email

2 Name the person who signs

In the same Completed by panel, select Assign someone to complete, choose Signs and enter the signer's details. Select Assign and email.

Each investment has one signer. They review the details and sign the subscription documents for the business. If you name nobody, the main contact signs.

ON SCREEN

Signs | Assign and email

3 Add owners and people who control the business

Under People on this investment, select Add another person (identity check & signature). Enter their First name, Last name, Email, Role (for example Beneficial owner, Control person, Manager or Authorized signer), Title and Ownership %.

Leave Email them an identity check (ID + selfie) ticked so they verify themselves. To make this person the signer, tick Make them the signer and send them the signature page. Select Add person.

Add the people the business verification asks for. Each one completes their own identity check.

ON SCREEN

People on this investment | Add another person (identity check & signature)

Email them an identity check (ID + selfie) | Add person

4 Add colleagues who only need to follow along

Under Points of contact, select Add point of contact, enter their Full name, Email and Title, then select Add and email view link.

Points of contact sign in and see the investment and its progress. Their access is view only. You can add up to 10.

ON SCREEN

Points of contact | Add point of contact | Add and email view link

What happens next

1 Everyone signs in with their own email

Each person gets their own email from Harmonious and signs in with the exact address you entered. Nobody shares a login.

The main contact completes About You, Verification, Sign and Fund. For a business, Verification includes the entity documents, the owners and signers, and the entity W-9.

ON SCREEN

About You | Verification | Sign | Fund

2 Follow progress and approve

The Investors list shows what the business is waiting on. Open the investor's page to see each person's status.

After the signer signs, select Approve to send funds and confirm. The business can then see the fund's released bank details and send its money.

ON SCREEN

Approve investor to send funds | Approve to send funds

Who can do what

Each person only gets the access their role needs. Every change is recorded.

Main contact

Gets the invitation and completes the investment for the business: details, verification, documents and funding. Signs too, unless you name a separate signer.

Contact email

Preparer

Fills in details, owners and signers, and uploads documents. Can't pass identity checks, sign, change the amount or send money.

Prepares details

Signer

Reviews the details and signs the subscription documents for the business. One signer per investment.

Signs | Make them the signer and send them the signature page

Owners and control persons

Complete their own identity check with a photo ID and selfie. Nobody can do this for them.

Email them an identity check (ID + selfie)

Point of contact

Signs in to see the investment and its progress. View only: can't enter details, sign or send money.

Point of contact (view only)

If something goes wrong

Can everyone have the same full access as the main contact?

> Each investment has one main contact. Everyone else gets one of the roles above, so it's always clear who entered the details, who verified and who signed.

It says extra points of contact are for joint accounts, entities and trusts

> The investor was added as an individual. On the investor's page, select Change to joint, entity or trust, choose Entity and enter the legal name, then add the people again. This works only before signing or funding starts.

It says to remove the current signer before naming a new one

> An investment has one signer. Select Remove next to the current signer, then name the new one.

Someone can't see the investment

> They must sign in with the exact email you entered. If they see a message asking them to sign in as a different address, they're using another login.
>
> Check their email on the investor's page. If it's wrong, remove them and add them again with the right address.

It says a person was added but Harmonious will confirm it isn't a duplicate

> Harmonious found someone similar already on file. Their identity check is sent once Harmonious confirms who they are. You don't need to add them again.

Someone left the business or shouldn't have access anymore

> Select Remove next to their name. You'll see Access ended. Their history is kept.

The same people invest in another of my funds

> Access is set for each investment. Add the business to the other fund and give the team access there too. Search existing investors finds the business so it isn't entered twice.

Can a preparer or point of contact sign or send money?

> No. Only the named signer, or the main contact if no signer is named, signs. Each owner verifies their own identity.

Still stuck?

Email support@harmonious.co, or use Messages in your portal to contact Harmonious. The business's team should contact you with questions about the investment itself, such as amounts, terms or documents.
